

Versa-Vac... Versatile, Portable, Gas Powered Vacuum

Make short work of messy time-consuming insulation removal jobs with the Meyer Versa-Vac. The Versa-Vac is designed for fast, profitable removal of blown-in insulation as well as fire, water and smoke damaged insulation from attics, sidewalls and crawl spaces.

Material intended for recycling can be conveyed directly to your spraying machine for reuse. Waste material can be discharged directly into 75 cu. ft. disposable collection bags or directly into a Dumpster® receptacle. In most cases, you can recover your investment after just a few jobs.
