

Manufacturer's Defect Warranty

Carlisle Spray Foam Insulation warrants that our Products meet the published physical and chemical properties (Product Specifications) of the liquid products at the time they are shipped.

Physical characteristics of spray-applied polyurethane foam insulation are dependent upon various factors at the time of installation. These factors include but are not limited to, the temperature of the product at the time of application, environmental conditions such as air temperature, substrate temperature and relative humidity, and capabilities of application equipment including mixing chamber size, tip size, as well as equipment pressure and temperature settings, and the skill of the applicator(s). These factors are outside the control of Carlisle. Physical characteristics of applied products are determined by the applicator.

Carlisle warrants that, if applied according to our published processing parameters, the finished product will have the physical characteristics as defined in the product technical data sheets.
